10 **UNITED STATES DISTRICT COURT**  
11 **NORTHERN DISTRICT OF CALIFORNIA**  
12 **SAN FRANCISCO DIVISION**

13 CAROLINA BERNAL STRIFLING,  
14 WILLOW WREN TURKAL, and SYDNEY  
15 FREDERICK-OSBORNE on behalf of  
themselves and all others similarly situated,

16 Plaintiffs,

17 v.

18 TWITTER, INC., and X CORP.,

19 Defendants

20 Case No. 22-cv-07739-JST

21 **AMENDED CLASS AND COLLECTIVE**  
**ACTION COMPLAINT AND JURY**  
**DEMAND**

1. DISCRIMINATION IN VIOLATION  
OF TITLE VII, 42 U.S.C. § 2000e, *et seq.*
2. DISCRIMINATION IN VIOLATION  
OF THE CALIFORNIA FAIR  
EMPLOYMENT AND HOUSING  
ACT, Gov. Code § 12900, *et seq.*
3. DISCRIMINATION IN VIOLATION  
OF THE ADEA, 29 U.S.C. § 621, *et seq.*
4. DISCRIMINATION IN VIOLATION  
OF THE CALIFORNIA FAIR  
EMPLOYMENT AND HOUSING  
ACT, Gov. Code § 12900, *et seq.*

1           **I. INTRODUCTION**

2           1. Plaintiffs Carolina Bernal Strifling, Willow Wren Turkal, and Sydney Frederick-  
 3 Osborne file this Class and Collective Action Complaint against Twitter, Inc. and X Corp.  
 4 (collectively “Twitter”), on their own behalf and on behalf of other female Twitter employees  
 5 across the country who have been discharged or constructively discharged from their jobs during  
 6 the chaotic months since multi-billionaire Elon Musk purchased the company.

7           2. Plaintiffs bring claims of discrimination under Title VII, 42 U.S.C. § 2000e, *et*  
 8 *seq.*, and (for employees who worked out of California) the California Fair Employment and  
 9 Housing Act (“FEHA”), Gov. Code § 12900, *et seq.*, challenging the company’s termination, or  
 10 constructive termination, of female employees since Elon Musk’s acquisition of the company.

12           3. Plaintiff Frederick-Osborne also files this Class and Collective Action Complaint  
 13 against Twitter on her own behalf and on behalf of other Twitter employees age fifty (50) or  
 14 older across the country who have been discharged or constructively discharged from their jobs  
 15 during the chaotic months since multi-billionaire Elon Musk purchased the company.

16           4. Plaintiff Frederick-Osborne brings claims of discrimination under the Age  
 17 Discrimination in Employment Act of 1967 (“ADEA”), and (for employees who worked out of  
 18 California) the California Fair Employment and Housing Act (“FEHA”), Gov. Code § 12900, *et*  
 19 *seq.*, challenging the company’s termination or constructive termination of employees age fifty  
 20 (50) or older since Elon Musk’s acquisition of the company.

21           5. As described further below, shortly after Elon Musk completed his purchase of  
 22 Twitter, he immediately began laying off more than half of its workforce.

23           6. The mass termination of employees at Twitter has impacted female employees to  
 24 a much greater extent than male employees – and to a highly statistically significant degree.  
 25 Moreover, Elon Musk has made a number of publicly discriminatory remarks about females,  
 26 further confirming that the mass termination’s greater impact on female employees resulted from  
 27

discrimination. Musk also quickly implemented new policies at Twitter that were intended to, and the effect of, forcing more women to leave the company.

7. Likewise, the mass termination of employees at Twitter has impacted employees age fifty (50) or older to a greater extent than employees under the age of fifty (50) – and to a statistically significant degree. Moreover, Elon Musk has made publicly discriminatory remarks about older people, so it is not surprising that the managers working under his direction laid off a higher proportion of older employees. Musk also quickly implemented new unreasonable work demands and policies at Twitter, which were intended to, and had the effect of, forcing out older employees.

8. Plaintiffs file this action on their own behalf and on behalf of similarly situated individuals, bringing claims of sex and age discrimination.

## II. PARTIES

9. Plaintiff Carolina Bernal Strifling is an adult resident of Miami, Florida, where she worked for Twitter from June 2015 until November 2022. Ms. Strifling was employed by Twitter as a Senior Client Partner Lead. Throughout her employment with Twitter, Ms. Strifling's performance met the Company's expectations.

10. Plaintiff Willow Wren Turkal is an adult resident of San Jose, California, where she worked for Twitter from June 2021 until November 2022. Ms. Turkal was employed by Twitter as a Staff Site Reliability Engineer. Throughout her employment with Twitter, Ms. Turkal's performance met the Company's expectations.

11. Plaintiff Sydney Frederick-Osborne is an adult resident of San Francisco, California, where she worked for Twitter from June 2022 until November 2022. Ms. Frederick-Osborne was employed by Twitter as a Staff Software Engineer. Throughout her employment with Twitter, Ms. Frederick-Osborne's performance met the Company's expectations.

12. Plaintiffs bring this lawsuit as a Rule 23 class action on behalf of all similarly situated female Twitter employees across the United States whose jobs have been affected by the company's layoffs, terminations, and constructive discharges based on the heightened and unreasonable demands placed on the company's workforce since Elon Musk acquired the company.

13. Plaintiff Frederick-Osborne also brings this lawsuit as a collective action under the ADEA on behalf of all Twitter employees across the United States age fifty (50) or older who have lost their jobs since Elon Musk acquired the company, and as a Rule 23 class action for those employees who worked in California.

14. Defendant Twitter, Inc. is a Delaware corporation, headquartered in San Francisco, California.

15. Defendant X Corp. is a Nevada corporation, headquartered in San Francisco, California.

16. In or about March 2023, Twitter merged with X Corp., and as a result Twitter and X Corp. are a single entity. X Corp. has successor liability for Twitter's unlawful acts. Twitter and X Corp. are referred to herein as "Twitter".

### **III. JURISDICTION**

17. This Court has jurisdiction over this proceeding pursuant to 28 U.S.C. § 1331 and 29 U.S.C. § 2104(a)(5).

18. This Court has supplemental jurisdiction under 28 U.S.C. § 1337 over Plaintiffs' state law claims, because those claims derive from a common nucleus of operative facts with Plaintiffs' federal claims.

19. This Court has personal jurisdiction over Twitter, as it is headquartered in this District and conducts substantial business operations in this District.

1           **IV. STATEMENT OF FACTS**

2           20. Twitter is a social media company that used to employ thousands of people across  
 3 the United States.

4           21. In April 2022, it was announced that multi-billionaire Elon Musk would be  
 5 purchasing the company.

6           22. Following Elon Musk's purchase of Twitter in late October 2022, Musk  
 7 immediately began a mass layoff that affected well more than half of Twitter's workforce. See  
 8 Kate Conger, Ryan Mac, and Mike Isaac, Confusion and Frustration Reign as Elon Musk Cuts  
 9 Half of Twitter's Staff, NEW YORK TIMES (November 4, 2022),  
 10 <https://www.nytimes.com/2022/11/04/technology/elon-musk-twitter-layoffs.html>; Kate Conger,  
 11 Ryan Mac, and Mike Isaac, In Latest Round of Job Cuts, Twitter is said to Layoff at Least 200  
 12 Employees, NEW YORK TIMES (February 26, 2023),  
 13 <https://www.nytimes.com/2023/02/26/technology/twitter-layoffs.html>; Ryan Morrison, Twitter  
 14 'lays off 10% of its global workforce' in Elon Musk's latest job cuts, TECHMONITOR (February  
 15 27, 2023, updated March 9, 2023) ("The Company's headcount is down 75%."),  
 16 <https://techmonitor.ai/policy/digital-economy/twitter-job-cuts-elon-musk>.

17           23. The decisions regarding which employees would be laid off were made under  
 18 extremely hurried circumstances, with little if any regard given to employees' job performance,  
 19 qualifications, experience, and abilities. Indeed, decisions regarding laying off thousands of  
 20 employees were made in a period of just days after Musk's acquisition of the company.

21           24. Most laid off employees were notified on November 4, 2022 (although many of  
 22 these employees were aware they had been laid off the night before, when their access to  
 23 Twitter's systems was cut off).

24           25. Reportedly, the layoff decisions were made quickly by a small group of managers,  
 25 under close supervision by Musk. Some of these managers were brought in from other  
 26

1 companies owned by Musk (such as Tesla), who did not have much, if any, knowledge about  
 2 Twitter's operations. See Lora Kolodny, Elon Musk has pulled more than 50 Tesla employees  
 3 into his Twitter takeover, CNBC (November 1, 2022), Elon Musk has pulled more than 50 Tesla  
 4 employees into Twitter (cnbc.com).

5 26. Widely circulated pictures of Twitter employees before and after the layoff raised  
 6 observations about the stark contrast in the number of women who appeared to be employed at  
 7 the company before and after Musk's acquisition. Rachna Manojkumar Dhanrajani, Curious  
 8 case of Twitter's missing women: Before and after pictures shock the internet, Business Today  
 9 (November 21, 2022), Curious case of Twitter's missing women: Before and after pictures of  
 10 Twitter office shock the internet - BusinessToday; Kanishka Sarkar, Where have all the women  
 11 gone from Elon Musk's Twitter? 'Before & after' office photos shock internet, CNBC (November 21,  
 12 2022), Where Have All The Women Gone From Elon Musk'S Twitter? 'Before & After' Office  
 13 Photos Shock Internet (cnbctv18.com).

14 27. The data from these layoffs bear out these observations.

15 28. According to a spreadsheet showing which Twitter employees in the United  
 16 States were retained and which were laid off on November 4, 2022, approximately 2,621 out of  
 17 5,134 employees were notified that day they were being laid off.<sup>1</sup>

18 29. Prior to the layoffs that day, Twitter employed approximately 2,234 female  
 19 employees and 2,900 male employees in the United States. Of those employees, approximately  
 20 1,271 females and 1,350 males were notified that day they were being laid off.

21  
 22  
 23  
 24  
 25  
 26 <sup>1</sup> The figures throughout this complaint are described as "approximate" because employees  
 27 for whom their gender was not immediately clear were not included in these calculations.

1       30.     Thus, 57% of female employees were laid off on November 4, 2022, while 47%  
 2 of male employees were laid off.

3       31.     Not only is this a large percentage difference, but it is also extremely statistically  
 4 significant.

5       32.     According to Dr. Mark Killingsworth, a professor in the Department of  
 6 Economics at Rutgers University,<sup>2</sup> a chi square statistical analysis reveals that this distribution in  
 7 layoffs by sex is 7.3491 standard deviations away from a normal distribution. In other words,  
 8 the odds that this disparity between women and men being laid off is due only to chance  
 9 is .00000000000001 (or, put another way, 9.977 out of 100 trillion).

10      33.     Further, the disparity between women and men being laid off cannot be explained  
 11 based upon a justification that Musk intended to retain more employees in engineering-related  
 12 roles.

13      34.     According to the spreadsheet, prior to the layoffs that day, Twitter employed  
 14 approximately 863 female and 1,834 male employees in engineering-related roles in the United  
 15 States. Of those employees, approximately 507 females and 826 males were notified that day

---

16      2       A federal court has described Dr. Killingsworth's qualifications as follows:

17  
 18      Dr. Killingsworth is a labor economist with more than 40 years of experience and has a  
 19 substantial record as an expert witness in federal and state litigation. He is the author of  
 20 *Labor Supply* and *The Economics of Comparable Worth*, and has also authored numerous  
 21 publications in the areas of comparable worth, pay equity, employment discrimination,  
 22 and wage differentials. Also, Dr. Killingsworth has testified in front of United States  
 23 Congressional Committees and the General Assembly of Pennsylvania. In addition, he  
 24 has been a consultant to United States District Judge Robert L. Carter, the Canadian  
 25 Department of Justice, and the United States Departments of Justice and Labor. Dr.  
 26 Killingsworth graduated from the University of Michigan and received M.Phil. and  
 27 D.Phil. degrees from the University of Oxford, where he was a Rhodes Scholar.

28      Artunduaga v. Uni. Of Chicago Med. Ctr., 2016 WL 7384432, at \*2-3 (N.D. Ill. Dec. 21, 2016)  
 29 (citing cases).

1 they were being laid off. Thus, 59% of females in engineering-related roles were laid off on  
 2 November 4, 2022, while 45% of male employees in engineering-related were laid off.  
 3

4 35. This disparity is also extremely statistically significant. According to Dr.  
 5 Killingsworth, a chi square test reveals that this distribution in layoffs by sex is 7.6380 standard  
 6 deviations away from a normal distribution. The odds that this disparity between women and  
 7 men in engineering-related roles being laid off is due only to chance is .00000000000001 (or, put  
 8 another way, 1.103 out of 100 trillion).

9 36. There is also a great disparity in the layoff rates between women and men in non-  
 10 engineering roles. Prior to the layoffs that day, Twitter employed approximately 1,371 female  
 11 and 1,066 male employees in non-engineering-related roles in the United States. Of those  
 12 employees, approximately 764 females and 524 males were notified that day they were being  
 13 laid off. Thus, 56% of females in non-engineering-related roles were laid off on November 4,  
 14 2022, while 49% of male employees in non-engineering-related were laid off. A chi square test  
 15 performed by Dr. Killingsworth revealed that this distribution in layoffs by sex is 4.0309  
 16 standard deviations away from a normal distribution. The odds that this disparity between  
 17 women and men in non-engineering-related roles being laid off is due only to chance is .00001  
 18 (or, put another way, 2.778 out of 100 thousand).

19 37. These results are summarized in the following chart:

		Laid off	Not laid off	Total	% laid off	Standard deviations from normal	Probability of this distribution being based on chance
ALL EMPLOYEES	Female	1271	963	2234	0.57	7.3491	$9.977 \times 10^{-14}$ (9.977 chances out of 100 trillion)
	Male	1350	1550	2900	0.47		
	<b>TOTAL</b>	<b>2621</b>	<b>2513</b>	<b>5134</b>			
EMPLOYEES IN ENGINEERING-RELATED POSITIONS	Female	630	373	1003	0.63	7.638	$1.103 \times 10^{-14}$ (1.103 chances out of 100 trillion)
	Male	1037	1113	2150	0.48		
EMPLOYEES IN NON-ENGINEERING-RELATED POSITIONS	Female	545	517	1062	0.51	4.0309	$2.778 \times 10^{-5}$ (2.778 chances out of 100 thousand)
	Male	312	436	748	0.42		

38. Thus, it is clear that women were far more likely than men to be laid off from Twitter, and those differences are highly statistically significant.

39. Older employees (those age 50 and over) were also statistically more likely to be chosen for layoff on November 4, 2022, than younger employees.

40. In addition to laying off a higher proportion of women than men, and a higher proportion of employees age fifty (50) and older, in the initial layoffs at Twitter in early November, Elon Musk also implemented a number of policies at the company that have had a disproportionate impact on women and that also sent the message that older employees were no longer welcomed at Twitter.

41. These policies included expectations that employees would work an unreasonable number of hours and that employees would be required to work out of physical offices (despite the fact that Twitter had freely allowed remote work throughout the pandemic and even before that).

42. Following Musk's acquisition of the company, employees were reported to work 12 hour shifts, 7 days a week. Some employees were told: "The expectation is literally to work 24/7 to get this out." Some employees slept in Twitter offices while being required to work around the clock. Grace Dean, BUSINESS INSIDER, Twitter staff have been told to work 84-hour weeks and managers slept at the office over the weekend as they scramble to meet Elon Musk's Tight deadlines, reports say, (Nov. 1, 2022), <https://www.businessinsider.com/elon-musk-twitter-staff-layoffs-long-hours-shifts-work-jobs-2022-11>.

43. These demands occurred while the company was in the process of mass layoffs, thus signaling to employees that these extraordinary efforts were required in order to keep their jobs.

1       44.    Elon Musk would certainly have known that these policy changes and  
2 expectations would have a disproportionate impact on women, as well force older employees out  
3 of the company.  
4

5       45.    On November 16, 2022, Musk sent the following email to remaining Twitter  
6 employees:  
7

8           Going forward, to build a breakthrough Twitter 2.0 and succeed in an increasingly  
9 competitive world, we will need to be extremely hardcore. This will mean working long  
10 hours at high intensity. Only exceptional performance will constitute a passing grade.  
11

12           Twitter will also be much more engineering-driven. Design and product management  
13 will still be very important and report to me, but those writing great code will constitute  
14 the majority of our team and have the greatest sway. At its heart, Twitter is a software  
15 and servers company, so I think this makes sense.  
16

17           If you are sure that you want to be part of the new Twitter, please click yes on the link  
18 below:  
19

20           [LINK]  
21

22           Anyone who has not done so by 5pm ET tomorrow (Thursday) will receive three months  
23 of severance.  
24

25           Whatever decision you make, thank you for your efforts to make Twitter successful.  
26

27           Elon  
28

46.    The ultimatum was intended to, and did, result in further layoffs. The ultimatum  
resulted in more women, including Ms. Frederick-Osborne, leaving the company than men.  
Indeed, approximately 36% of remaining women left the company as a result of this ultimatum,  
while approximately 28% of men did.

47.    The undertone of the policies and message from Twitter was also that it was  
prioritizing younger employees and was not welcoming to older employees.

48.    Following Musk's ultimatum, Ms. Frederick-Osborne, who was in her late 50s at  
the time, felt she was no longer welcome at Twitter, given her sex and age. She felt that Musk's

1 policies and messages seemed directed at maintaining a workforce that was largely young and  
 2 male. As such, she did not click yes on the ultimatum link that Musk sent employees on  
 3 November 16, 2022.

4 49. The next day, Ms. Frederick-Osborne was laid off.

5 50. The fact that more women than men were laid off and forced out of the company  
 6 through constructive discharge since Musk's acquisition is not surprising given Musk's history  
 7 of making sexist, demeaning, and hostile comments against women. Such comments show his  
 8 discriminatory animus against women, and it is understandable that women would feel less  
 9 welcome in the workplace under his leadership. As Twitter's new owner and CEO, who  
 10 oversaw and closely managed the employees who were making layoff decisions and  
 11 implementing his policies, Musk's discriminatory animus is imputed to Twitter.

12 51. Examples of Musk's discriminatory and demeaning comments about women  
 13 include his posting of tweets on Twitter in which he joked about naming a school using the  
 14 acronym "TITS" and making other jokes about women's breasts. See Chandra Steele, Elon  
Musk is a Misogynist and It Matters, PCMag (December 13, 2021), Elon Musk Is a Misogynist  
and It Matters | PCMag (quoting Musk's tweet: "Am thinking of starting new university: Texas  
 15 Institute of Technology & Science"); Jon Christian, Elon Musk Deletes Sexist Tweets, The Byte  
 16 (October 31, 2021), Elon Musk Deletes Sexist Tweets (futurism.com); Stock Joker on Twitter:  
"@ZJAyres @PhilKoopman Now deleted, but only D cups need apply  
https://t.co/40NBcDTonb" / Twitter); Ananya Bhattacharya, In one tweet, Elon Musk captures  
the everyday sexism faced by women in STEM, Quarz (November 1, 2021), Elon Musk's tweet  
captures everyday sexism faced by women in STEM (qz.com).

17 52. Shortly before acquiring Twitter, Musk, who has been vocal about promoting  
 18 women having a lot of babies (presumably disseminating the message that is more important  
 19 than keeping their jobs), tweeted: "Being a Mom is just as important as any career." Twitter  
 20

1 (August 17, 2022), <https://twitter.com/elonmusk/status/1559823434028400640>. Within weeks  
 2 of announcing the layoffs, Musk tweeted “Testosterone rocks ngl”. Twitter (December 4, 2022),  
 3 <https://twitter.com/elonmusk/status/1599345615443746817>

4 53. More recently, Musk had the “w” on the sign of the corporate headquarters  
 5 painted white so that the company’s name appeared to be “Titter.” See Twitter (April 9, 2023),  
 6 <https://twitter.com/elonmusk/status/1645266104351178752?cxt=HHwWgJC-7cGzINUtAAAAA>.

7 54. Similarly, the fact that older employees were laid off in greater proportion than  
 8 younger employees, and many older employees were forced out of the company since Musk’s  
 9 acquisition, is not surprising given Musk’s history of making ageist comments. Such comments  
 10 show his discriminatory animus against older individuals, and it is understandable that older  
 11 employees would feel less welcome in the workplace under his leadership. As Twitter’s new  
 12 owner and CEO, who oversaw and closely managed the employees who were making layoff  
 13 decisions and implementing his policies, Musk’s discriminatory animus is imputed to Twitter.

14 55. For example, in a 2022 interview with the CEO of the publishing company Axel  
 15 Springer, Musk commented:

16 I don’t think we should try to have people live for a really long time. That  
 17 it would cause asphyxiation of society because the truth is, most people  
 18 don’t change their mind, …they just die. So, if they don’t die, we will be  
 19 stuck with old ideas and society wouldn’t advance . . . [a]nd it is just  
 20 impossible to stay in touch with the people if you are many generations  
 21 older than them.

22 <https://www.foxbusiness.com/lifestyle/lonely-elon-musk-humans-shouldnt-live-longer-asphyxiate-society>.

1

2 **V. EXHAUSTION OF ADMINISTRATIVE REMEDIES**

3 56. Plaintiff Strifling has filed an administrative charge of sex discrimination under  
4 Title VII with the Equal Employment Opportunity Commission. She has received a Right to Sue  
5 letter to pursue this claim in court.

6 57. Plaintiff Turkal has filed an administrative charge of sex discrimination under  
7 Title VII with the Equal Employment Opportunity Commission and under the California Fair  
8 Employment and Housing Act with the California Civil Rights Department. She has received a  
9 Right to Sue letter to pursue this claim in court.

10 58. Plaintiff Frederick-Osborne has filed an administrative charge of sex  
11 discrimination under Title VII and age discrimination under the ADEA with the Equal  
12 Employment Opportunity Commission and under the California Fair Employment and Housing  
13 Act with the California Civil Rights Department. She has received a Right to Sue letter to pursue  
14 these claims in court.

15

16 **COUNT I**

17

18 **Title VII,**  
19 **42 U.S.C. § 2000e, *et seq.***

20 Plaintiffs and other female employees have been entitled to the protections of Title VII,  
21 42 U.S.C. § 2000e, *et seq.*, which prohibits discrimination on the basis of sex. Twitter's conduct  
22 in conducting mass layoffs that affected a higher proportion of women than men, as well as other  
23 policies that led to more women leaving the company after Musk's acquisition of Twitter,  
24 constitutes unlawful discrimination against Plaintiffs and other similarly situated female Twitter  
25 employees on the basis of sex in violation of Title VII.

## **COUNT II**

# California Fair Employment and Housing Act, Gov. Code § 12900, *et seq.* (Sex Discrimination)

Plaintiffs and other female employees have been entitled to the protections of the California Fair Employment and Housing Act (“FEHA”), Gov. Code § 12900, *et seq.* Twitter’s conduct in conducting mass layoffs that affected a higher proportion of women than men, as well as other policies that led to more women leaving the company after Musk’s acquisition of Twitter, constitutes unlawful discrimination against Plaintiffs and other similarly situated female Twitter employees who worked in California on the basis of sex in violation of the FEHA.

### **COUNT III**

## **Age Discrimination in Employment Act, 29 U.S.C. § 621**

Plaintiff Frederick-Osborne and other older employees are entitled to the protections of the ADEA, 29 U.S.C. § 621, which prohibits discrimination on the basis of age. Twitter's conduct in conducting mass layoffs that affected a higher proportion of older employees (age fifty (50) and over), as well as other policies that led to more older employees leaving the company after Musk's acquisition of Twitter, constitutes unlawful discrimination against Plaintiff and other similarly situated Twitter employees on the basis of age in violation of the ADEA.

## COUNT IV

# California Fair Employment and Housing Act, Gov. Code § 12900, *et seq.* (Age Discrimination)

Plaintiff Frederick-Osborne and other employees age fifty (50) and older have been entitled to the protections of the California Fair Employment and Housing Act (“FEHA”), Gov. Code § 12900, *et seq.* Twitter’s conduct in conducting mass layoffs that affected a higher

1 proportion of older employees (age fifty (50) and over), as well as other policies that led to more  
2 older employees leaving the company after Musk's acquisition of Twitter, constitutes unlawful  
3 discrimination against Plaintiff Frederick-Osborne and other similarly situated Twitter  
4 employees who worked in California on the basis of age in violation of the FEHA.  
5  
6

7 **JURY DEMAND**

8 Plaintiffs request a trial by jury on the claims asserted here.  
9

10  
11 WHEREFORE, Plaintiffs request that this Court enter the following relief:

12 a. Declare and find that Defendants are liable to Plaintiffs and other similarly situated  
13 female employees under Title VII, 42 U.S.C. § 2000e, *et seq.*, and, with respect to  
14 employees who have worked out of California, the Fair Employment and Housing  
15 Act, Gov. Code § 12900, *et seq.*;  
16 b. Declare and find that Defendants are liable to Plaintiff Frederick-Osborne and other  
17 similarly situated older employees whose rights are protected under the ADEA, 29  
18 U.S.C. § 621, and, with respect to employees who have worked out of California, the  
19 Fair Employment and Housing Act, Gov. Code § 12900, *et seq.*;  
20 c. Certify this case as a class action under Title VII and the Fair Employment and  
21 Housing Act;  
22 d. Certify this case as a collective action under the ADEA;  
23 e. Reinstate female and older employees who wish to return to their jobs;  
24 f. Award compensatory and any other appropriate damages, including emotional  
25 distress and punitive damages under Title VII and the Fair Employment and Housing  
26 Act;  
27

- g. Award liquidated damages under the ADEA;
- h. Award pre- and post-judgment interest;
- i. Award reasonable attorneys' fees, costs, and expenses; and
- j. Award any other relief to which Plaintiffs and other similarly situated employees may be entitled.

Respectfully submitted,

CAROLINA BERNAL STRIFLING, WILLOW WREN TURKAL, and SYDNEY FREDERICK-OSBORNE, on behalf of themselves and all others similarly situated,

By their attorneys,

/s/ Shannon Liss-Riordan
